

1. INSERT BOTH PARTS OF THE DIN REMOVAL TOOLS, (ONE ON EACH SIDE), INTO THE HOLES IN THE FACE OF THE RADIO. YOU MAY FEEL A SLIGHT CLICK AS THE TOOLS LOCK INTO THE SPRINGS HOLDING THE RADIO IN.
2. CAREFULLY PULL THE TOOLS OUTWARD (AWAY FROM EACH OTHER), SLIDE THE RADIO OUT OF THE DASH, UNPLUG WIRING CONNECTORS, THE ANTENNA CABLE, AND REMOVE THE UNIT.

CAUTION: SOME VEHICLES MAY HAVE A "CODE PROTECTED" RADIO. IF THESE TYPES OF RADIOS ARE TO BE RE-INSTALLED, YOU MUST HAVE THE CODE OR THE UNIT WILL NOT OPERATE.
